

## DTTC RULES FOR PLAY/PRACTICE SESSIONS

While participating in any DTTC open practice/play session, you agree to abide by the following rules:

- Players who are not seasonal members must pay the current pay-as-you-play fee before they begin play at any given session.
- Players may begin play on any open table as soon as they desire.
- A player arriving after all tables are full, must sign up for a specific table on the easel and notify the players currently using that table he is waiting, if possible.
- Since it's not always possible for a waiting player to notify players already using a table, it is also the responsibility of those players to regularly check the easel for sign-ups. Once players are notified or see a sign-up on the easel, they must begin a match (3/5) immediately. There will no longer be any practice/warm-up permitted.
- If a sign-up person notices the players on a table have not started their match, he should notify the DTTC partner in charge so he can handle the situation.
- Once a match is completed, the loser must leave and sign up for another table. The winner stays on his current table and begins play with the person who was signed up. If an additional person is already signed up, the match must start immediately. If no one is signed up, play may continue as above until another sign-up appears at which time a match must begin immediately.
- No player can be using a table at the same time he is signed up for another table and no player can be signed up for more than one table at a time.

The partners of DTTC reserve the right to exercise full discretionary privileges regarding appropriate disciplinary action for any violation of these rules.
